

This is crazy and just a waste of dollars. I pay for this service and should have the right to listen to whatever stations, wherever I want too. Time is critical these days and finally XM offers listeners exactly what they want, when they want it.

XM is no threat to those that have a product that competes and gives it customers what they want. If FM and AM gave customers what they used too, good music and diversity, none of this would have happened in the first place.

People have a choice what stations they choose to dial in and they have a choice to vote for those that do their bidding.

Thanks
